

Plastic stick machine (cotton buds stick use)

*Introduction of the machines

The machine composed of plastic extruder, cooling unit, haul-off device .etc .It can produce different specifications of stick or pipe such as single color, double color, three color, The product supplied by the machine used in a wide range in industrial filed. For example: Drinking straw in food industry, straws in medical area .etc

* Machine function

Quotation		USD11000		
Main parts	Main parts are: extruder, cooling water tank, hauling cutting system, stick gather equipment single color, bicolor or tricolor pipes can be realized.(air compressor, chiller ,automatic hopper as optional)			
Power supply	Main screw	380v ,3phase,50hz,7.5kw(VFD)		
	Sub-screw	/	0.75kw	0.75×2kw
	Hauling motor	0.75kw(VFD)×1		
	Cutting motor	0.75kw(VFD)×1		
Temperature Controller	5sets			
Automatic Counting Device	1set			
Way of Hauling	By rubber roller			
Way of cutting	Rotatory cutting			
Cooling water tank	Usually 3.4m, can be adjusted.			
Option				Air compressor (1.5 kw)
	Chiller(5HP)		Automatic Hopper with dry	
Specification of Pipe	Material	PP PE etc.		
	Diameter	2mm~3mm		
	Length	Customizable		
	Speed	1500-2300pc/mins		
	Color	Single		
Machine dimension L×W×H	8m×1m×1.7mm			
Weight of equipment	1.5T			

*Quotation

FOB ningbo per set as above from

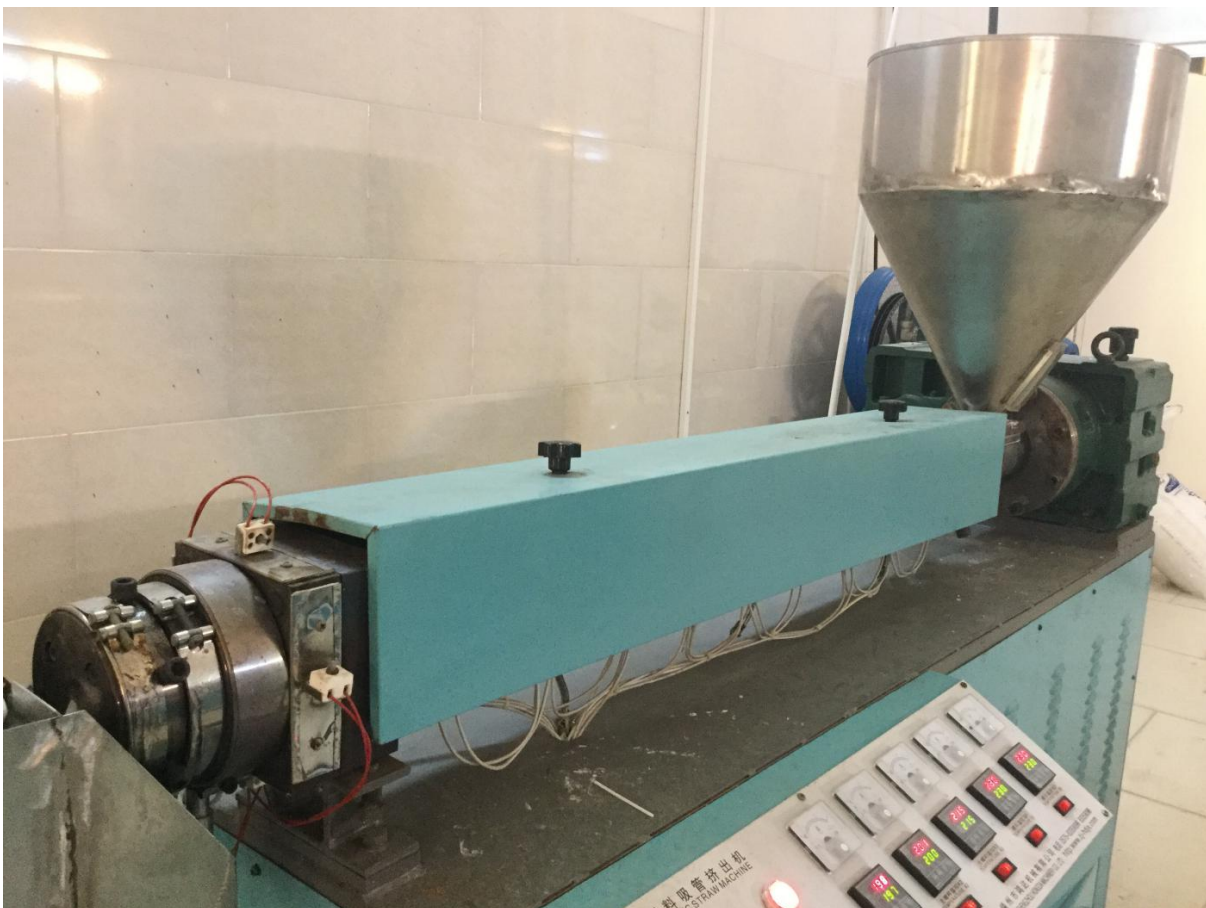

Payment Term :30% advance deposit ,balance before delivery

Warranty :12months

Shipment : within 30days after get your 30% deposit .

* Machine and straw Photo
